Top Skills

React Native
Expo
Mobile Applications

Certifications

Introduction to Web Development
with HTML, CSS, JavaScript
Developing Front-End Apps with
React
Developing Back-End Apps with
Node.js and Express
Building RESTful APIs with Node.js
and Express

Usama Hassan

Software Engineer | React • React Native (Expo) • Express/Node •
Full Stack | TypeScript | System Design | AWS • Docker | Exploring
AI & LLMs
Pakistan

Summary

I'm a Software Engineer and passionate Full Stack Developer with a strong focus on building scalable, user-friendly web applications. I currently specialize in the MERN stack, with extensive experience in React, JavaScript, TypeScript, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS, and modern frontend development. Throughout my journey, I've worked on real-world applications ranging from admin dashboards and e-commerce platforms to healthcare and business management systems. I enjoy solving complex engineering problems, optimizing application performance, and writing clean, maintainable code that delivers a great user experience. Beyond web development, I'm constantly expanding my knowledge in modern software engineering. I actively explore AWS, Docker, DevOps practices, cloud architecture, distributed systems, system design, Redis, GraphQL, and scalable application deployment. Recently, I've also been diving into AI, Large Language Models (LLMs), and AI Agents to understand how they're transforming modern software development. I believe that learning never stops. Whether it's exploring new technologies, understanding software architecture, or mastering deployment pipelines, I'm always looking for opportunities to grow as an engineer. I enjoy sharing my learning journey through technical articles and LinkedIn posts, hoping to help other developers while reinforcing my own understanding. My goal is to build software that not only works but is scalable, reliable, and maintainable. I'm passionate about continuous learning, contributing to the developer community, and connecting with like-minded engineers. Let's connect, learn, and build amazing software together!

Experience

Bellmedex Pakistan
Frontend Developer

December 2024 - Present (1 year 10 months)

Rawalpindi

Building scalable web and mobile applications for a healthcare technology company using React.js, React Native, and TypeScript.

Develop and maintain end-to-end features across web and mobile, from UI to API integration

Architect reusable UI components and Micro Frontend modules to keep our frontend modular and maintainable as the product scales

Build and consume RESTful APIs, and implement authentication & authorization workflows for production systems

Use AI-assisted tools (GitHub Copilot, ChatGPT, Claude) day-to-day to speed up delivery and raise code quality

Collaborate closely with backend engineers, QA, and product to ship reliable features in an Agile environment

SimplexMed

React Js Developer

July 2023 - December 2024 (1 year 6 months)

Abbottabad District

Built healthcare web applications using React.js, translating clinical workflow requirements into functional, user-friendly interfaces.

Developed and maintained features for healthcare products, working closely with clinical and product requirements

Built reusable component libraries to speed up development across modules

Integrated third-party and internal APIs to power core product features

Improved application performance and user experience across multiple product modules

CUI Sahiwal Software House

Trainee MERN Stack Developer

December 2022 - June 2023 (7 months)

Sahiwal, Punjab, Pakistan

Started my professional journey building full-stack applications using the MERN stack in a collaborative Agile team.

Built full-stack MERN applications, contributing across both frontend UI and backend API layers

Developed REST APIs and authentication systems from the ground up

Worked in an Agile team environment, learning real-world development workflows and best practices

Education

COMSATS University Islamabad

Bachelor's degree, Computer Software Engineering · (September 2019 - June 2023)
